DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species:

- Species I directed to a method comprising coupling an upper body to a housing via a hinge, wherein the coupling comprises connecting a support shaft to the upper body, and passing the support shaft through the hole, wherein the support shaft is capable of sliding through the hole, and wherein the upper body is capable of being positioned at any of a range of angles due to friction between the support shaft and the support block, wherein the hole comprises a straight hole and the support shaft comprises a straight shaft
- Species II directed to a method comprising coupling an upper body to a housing via a hinge, wherein the coupling comprises connecting a support shaft to the upper body, and passing the support shaft through the hole, wherein the support shaft is capable of sliding through the hole, and wherein the upper body is capable of being positioned at any of a range of angles due to friction between the support shaft and the support block, wherein the hole comprises a curved hole and the support shaft comprises a curved shaft

The species are independent or distinct because they represent mutually exclusive species, as evidenced by figures 6 and 7.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally

Art Unit: 2853

held to be allowable. Currently, claims 1 and 14 are generic. Please note that this election/restriction requirement was necessitated by the applicant's amendments to the claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
